## BAY STATE MILLING COMPANY EXPANDS PRODUCT OFFERINGS WITH THE ADDITION OF A NEW SPECIALTY MILL

Quincy, MA (August 5, 2011) - Bay State Milling Company has expanded its capabilities and capacity in Winona, Minnesota commissioning a new 2,500 hundredweight specialty mill. The mill is processing a broad assortment of cereal grains into unique flour and whole grain solutions focused on delivering flavor and natural health and wellness benefits through vitamins, minerals, and fiber.

The expansion and investment is integral to the company's mission and purpose of delivering value-added grain-based ingredients for its customers.

Doug DeWitt, Vice President of Customer and Business Development comments, "Our new specialty mill will allow us to better serve existing customers with a broader variety of offerings including grain types, granulations, and identity preservation as well as attract new customers seeking flours and grain blends with superior flavor, appearance, texture, functionality, and health benefits."

### About Bay State Milling Company

Bay State Milling Company has proudly provided exceptional flour and grain-based products since 1899. The company has a strong health and wellness focus and a commitment to be a leader in grain-based foods through investments in employees, specialty flour milling and custom blending capabilities.
